A MESSAGE TO OUR PATIENTS: Ear, Nose, and Throat Treatment & Office Procedures

By coming to our practice for consultation, please be aware that we are Ear, Nose, and Throat (ENT) Specialists. During the examination and work up of your ENT related medical or surgical problems, you may have to undergo ancillary procedures in order to obtain a diagnosis for your condition. This process may require you to undergo telescopic endoscopies of your nose.

If warranted, CT Scans, MRI's and Audiology testing may also be scheduled to assist us in further evaluation of your diagnosis and treatment.

In the event you require an endoscopy, the procedure is charged separate from your office visit. Insurance company process payment for endoscopic procedures under "office surgery" since endoscopy codes fall within the surgery portion of billing. When you receive your "Explanation of Benefits" from your insurance company you will see the office visit charge and office surgery charge which is the endoscopic procedure. Please be advised that coverage on your office visit /and procedure is between you and your insurance carrier, and some of these charge may be processed under your deductible plan.

Our ultimate goal is to treat your ENT health issues and return you back to normal living.

I understand the above and consent to the treatment plan as deemed necessary.
